EXPERTISE

Cloud platforms

AWS, Azure, Google Cloud

Infrastructure

Terraform, Ansible, Packer
Docker, Kubernetes

Delivery

Jenkins, TeamCity
GitHub, GitLab CI, Bamboo

Security

Vault, Trivy
SOC 2 controls

Languages

Python, Go, Bash
JavaScript, PHP

EDUCATION

Bachelor of Applied Science

Simon Fraser University
2010

PROFILE

Staff Software and Platform Engineer with 15+ years across software development, cloud infrastructure, and production operations. Builds automation for SaaS platforms, from infrastructure provisioning and deployment pipelines to secrets management and security controls. Partners with architecture, security, and delivery teams to improve reliability and make systems easier to operate.

EXPERIENCE

HP Inc

Staff Software & Platform Engineer

JUN 2021 - PRESENT

- Led automation and deployment improvements for SaaS services, working with delivery teams to meet service reliability and release objectives.
- Built immutable Linux VM provisioning with Packer and Ansible, with Python-based infrastructure validation to support adoption by engineering teams.
- Delivered centralized secrets management using Vault, Ansible, and Terraform, aligned with HP Cybersecurity standards.
- Contributed to SOC 2 Type I and Type II audits by standardizing and automating controls, collecting evidence, and coordinating with engineering, security, and external auditors.
- Integrated Trivy vulnerability scanning into CI pipelines; automated policy enforcement and resource cleanup with AWS Lambda.
- Partnered with the Platform Architect on proofs of concept for consistent CI/CD patterns across Jenkins, GitHub, and TeamCity.
- Created internal tools, runbooks, and technical documentation to support team adoption and ongoing platform maintenance.

TECHNICAL DEPTH

Systems

Linux, Windows Server
Nginx, HAProxy, Squid

Data

MySQL, MongoDB
Redis, Elasticsearch

Operations

ELK, New Relic
Disaster recovery
Rolling deployments

Pipeline tooling

Artifactory, SonarQube
Git, Bash, Python

EARLY EXPERIENCE

Software Engineer

Cackleberries
Dec 2011 - Apr 2012

Software Engineer

Real Estate Channel
Dec 2010 - Dec 2011

Software Engineer

Simon Fraser University
Co-op · Mar - Aug 2009

System Analyst

Shell Canada Ltd
Co-op · Sep - Dec 2008

EXPERIENCE CONTINUED

Global Relay

Software / DevOps Engineer II

JUN 2020 - JUN 2021

- Automated monthly patching and infrastructure provisioning for 150+ Windows Server and CentOS hosts using Ansible and scripting.
- Modernized CI/CD with Jenkins, Ansible, Bash, and Python; integrated Artifactory promotion and SonarQube analysis, and moved services to Docker and Kubernetes.
- Implemented an authenticating HTTP/SOCKS proxy and standardized host aliases, fully qualified domain names, and domain locations.

Sycle.net

APR 2012 - MAY 2020

DevOps / Release Engineer

JAN 2017 - MAY 2020

- Led rolling deployments that eliminated late-night releases, saving more than \$100,000 annually in deployment costs.
- Automated build, test, and deployment workflows across 17 production, 23 staging, and 50+ development and testing environments.
- Contributed to a Google Cloud disaster recovery solution and led adoption of Elasticsearch and Redis to improve application performance and resilience.

Software Engineer

APR 2012 - JAN 2017

- Built patient recovery pathways, invoicing and quoting, appointment management, financial reporting, and background processing for a global hearing-care SaaS platform using PHP, MySQL, and JavaScript.
